Engine VAZ 21214

This proved petrol 1.7 litre engine is equipped with BOSCH fuel injection. This OHC engine is able to run in any conditions – extremely low or high temperatures. The output and torque curves together with differential gear ratios enable a problem-free off-road driving. It is compatible with OBD II standard, so the vehicle can be diagnosed in any workshop equipped with BOSCH or OBD II compatible diagnostics. This engine type can be modified to LPG fuel.

Fuel:	Petrol
Engine capacity:	1690 mm ³
Output:	61 kW / 5000 rpm
Torque:	129 Nm / 4000 rpm
Fuel consumption:	10,2-10,5 l/100km
CO₂:	241-248 g/km

The long lifespan and overall reliability is secured by a 1.7 litre 8V engine. This engine demands low maintenance and keeps the costs down. An LPG modification is a further option. A VAZ 5-speed manual transmission allows operability in difficult conditions. A mechanically locking inter axle differential and an additional 2-speed low range gearbox are necessary for great off-road capability. Both are easily operated from the driver's seat with use of an additional gearshift lever.
